Nutrition Care Process-Standardized Language Committee

The committee is comprised of 11 members. The members on the committee represent a wide variety of expertise (e.g., community/public health, health informatics/information systems, long-term care/aging, acute care, ambulatory care, education, general clinical, diabetes, pediatric practice areas). The charge to the committee is to advance the Academy's strategic goals aimed at increasing demand for and utilization of services provided by members, and to empower members to compete successfully in a rapidly changing environment. It is recognized that actual publication, pricing distribution, copyright and other matters related to all work initiated by this committee may be handled by other administrative units of the Academy as may be most appropriate (i.e., publications, website, professional development).

Functions

- Guides the refinement of and changes of management activities in the implementation of the Nutrition Care Process
- Continues the research and development of Standardized Language to capture the elements of the Nutrition Care Process and other aspects of this system to deal with appropriate coding and related topics.
